HANA Cloud Central

Explanation

HANA Cloud Central is the unified admin workspace for *SAP HANA Cloud*. It combines monitoring, system navigation, SQL support, and *AI-driven assistance* in one environment. This helps administrators work faster, reduce switching between tools, and manage databases with more consistency.

Joule Activation

Assign Role

Ensure the HANA Cloud Administrator role is set.

Open Settings

Go to Settings in HANA Cloud Central.

Accept Terms

Review and accept the activation terms.

Confirm Enable

Confirm activation to access Joule in top nav.

The screenshot shows the 'Settings' page in HANA Cloud Central. The left sidebar contains a list of settings categories: User Account, Appearance, Preferred Region, App Notifications, SQL Console, Database Objects, Gen AI (highlighted), and Cookies. The main content area is titled 'Gen AI' and contains the following information:

- A blue banner with a checkmark icon and text: "Enabling Joule with limited features and AI-assisted database administration capabilities applies to all users in this subaccount."
- Text: "Gen AI in SAP HANA Cloud Central includes Joule with limited features, along with AI-assisted database administration capabilities."
- Section: "Usage Limits:" followed by "A daily usage limit of 0.5 Capacity Units (CU) per user is allocated. [Learn More](#)"
- Text: "Joule with limitations, SAP HANA Cloud, AI-assisted database administration"
- Status: "Enabled" with a green checkmark icon and a "Download Terms" link.
- Section: "Setting History (1)" with a table showing the activation status.

Alert Metrics

Overview

SAP Joule enables alert monitoring through natural language requests. Administrators can review alert summaries with severity and timestamps, assess overall system health through generated insights, and follow guided troubleshooting steps to resolve issues more efficiently.

Admin Tools Access

Plain Prompts

Admins use simple language prompts to reach the right admin application fast.

Direct Routing

The system routes users directly to relevant administration tools.

Action Buttons

Generated action buttons provide quick access to common admin tasks.

Less Menu Search

Reduces dependence on manual menu browsing and repeated navigation.

Faster Tasks

Speeds up routine HANA Cloud management work for administrators.

Better Usability

Improves the overall usability of daily administration workflows.

SQL Generation

Description

SAP Joule turns *natural language* requests into SQL for common monitoring and administration tasks. Users can review, refine, and run the generated query in the SQL Console, helping both *experienced admins* and *less technical users* work faster and with more confidence.

Sql/Generated_query.Sql

```
-- Prompt: Show recent long-running statements
SELECT statement_hash,
duration_ms,
user_name,
start_time
FROM monitoring_expensive_statements
WHERE start_time >= CURRENT_TIMESTAMP - INTERVAL '1' DAY
ORDER BY duration_ms DESC
LIMIT 10;
```
