

10 years of XSA Dead or Alive?

Who am I?

Timo Wagner

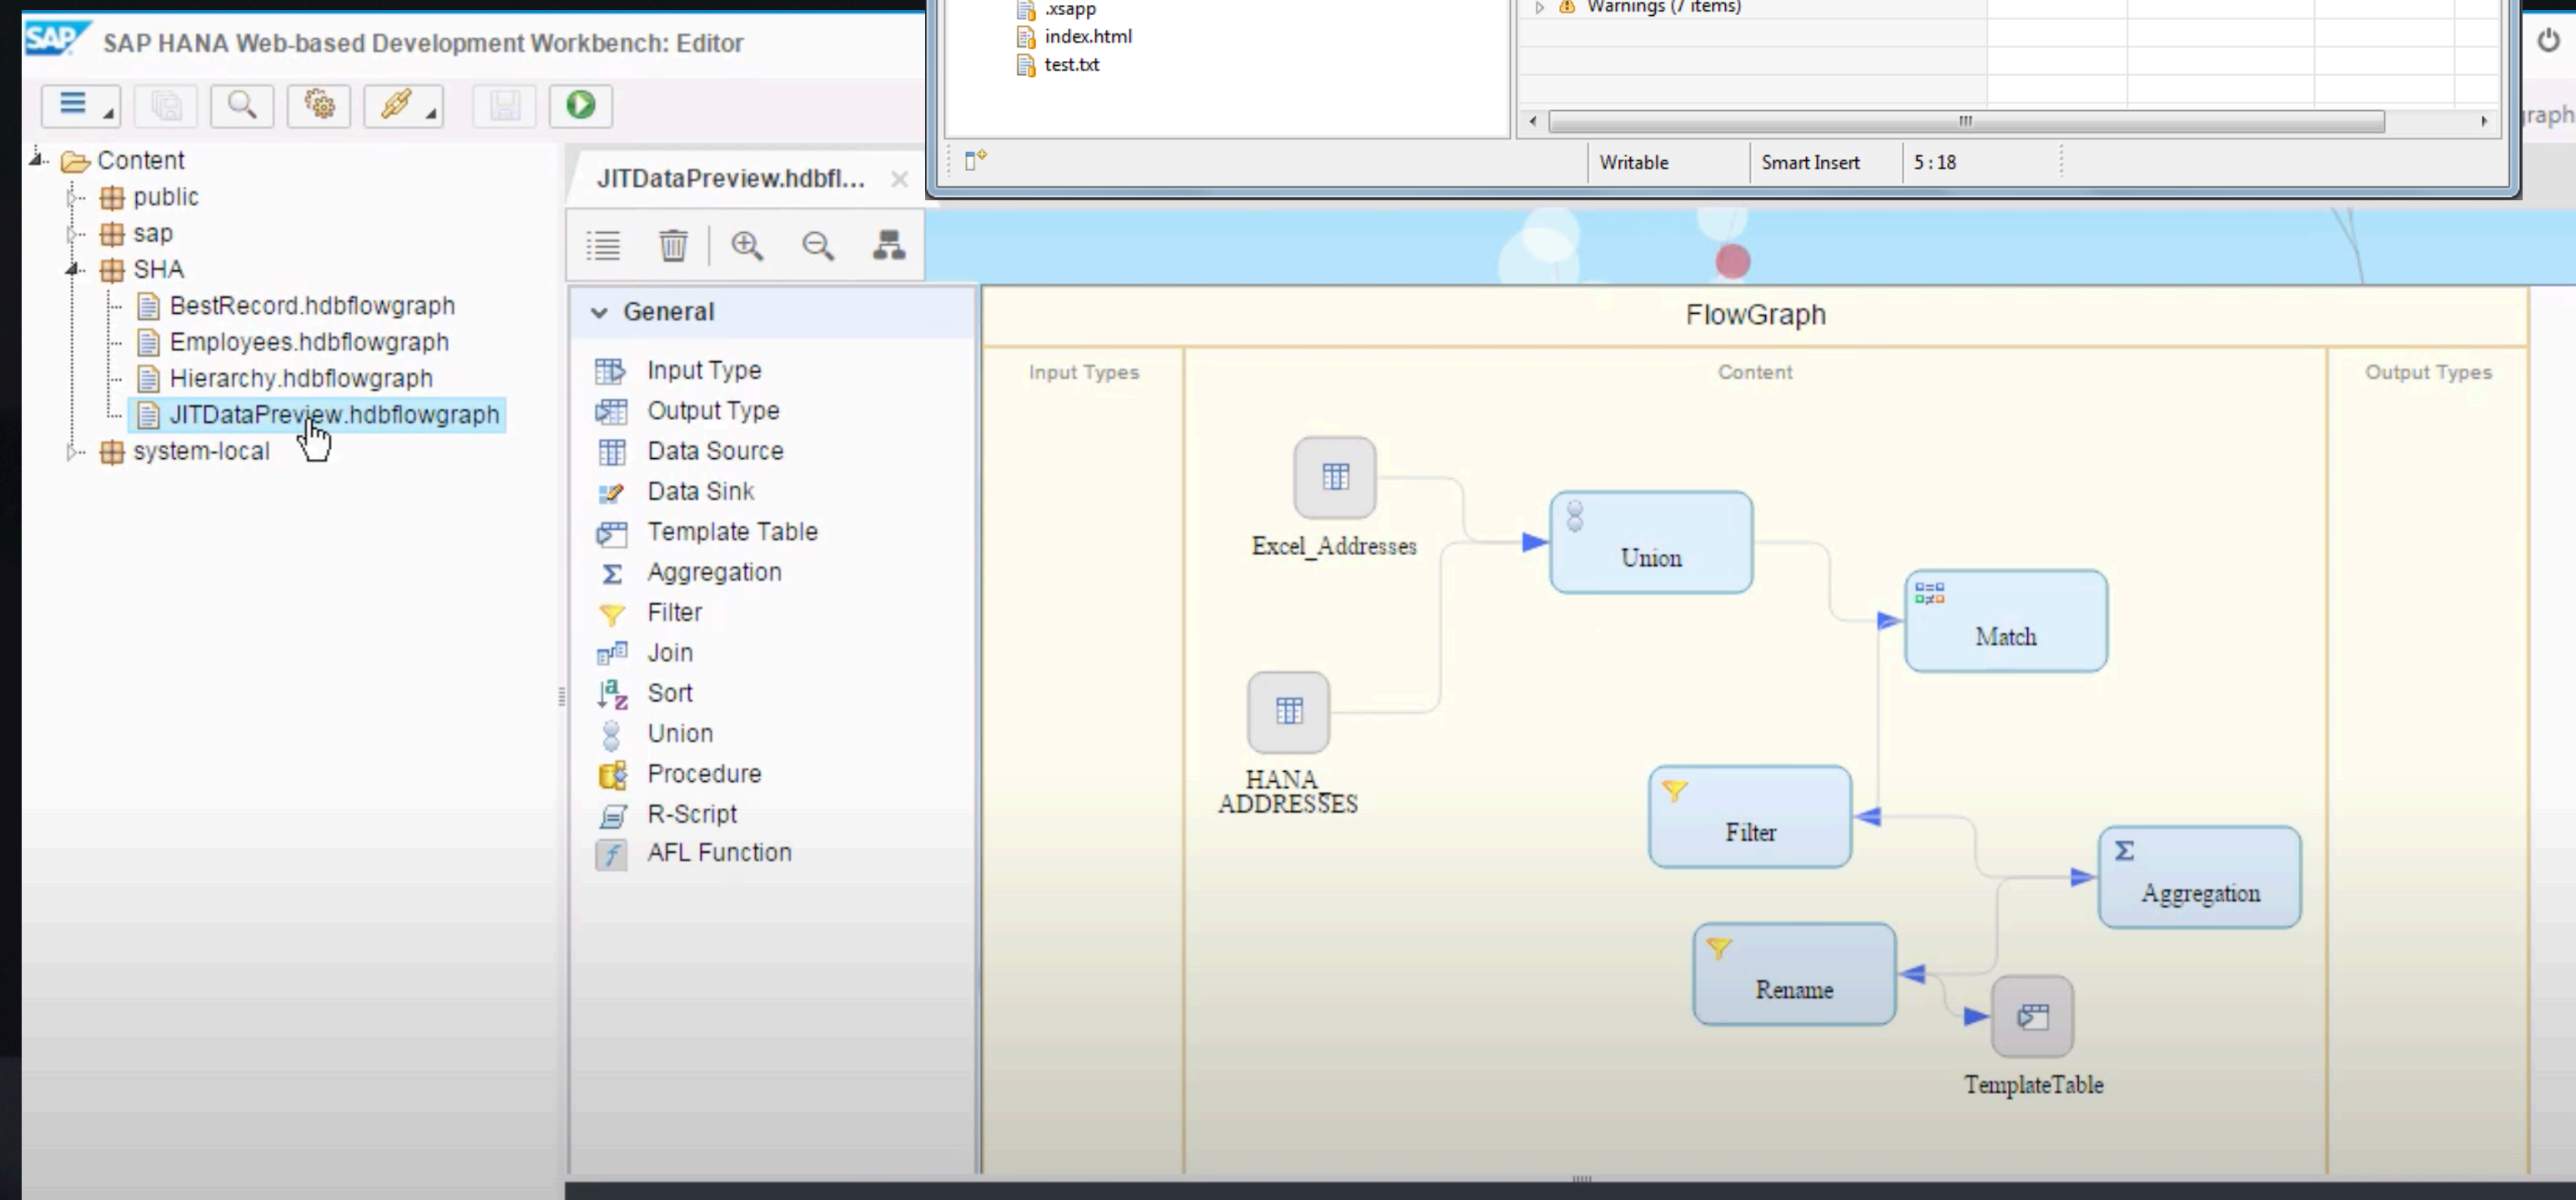

- Freelance Software Engineer
(focus on SAP HANA technologies)
- Former Developer @ SAP
Worked on HANA SDI editors,
DPAgent, Adapters, Agile Data
Preparation and
Data Hub / Data Intelligence

How did we get here?

SAP HANA Extended Application Services aka XS Classic (2012-2017)

- Single application runtime
- Built on Mozilla SpiderMonkey
- Running on the DB Server
- Shared active repository
- \$repo can be used from Hana Studio and “XSC WebIDE”
- Lifecycle management through transports

2465027 - Deprecation of SAP HANA extended application services, cla...

SAP Note, Version: X, Released On: 2017

Transition from SAP HANA extended application services, classic model to SAP HANA extended application services, advanced model

SAP HANA extended application services, advanced model was first introduced with SAP HANA 1.0 SPS 11.

With SAP HANA 2.0, SAP HANA extended application services, advanced model becomes the default framework for new native application development, and SAP recommends that you use SAP HANA extended application services, advanced model to develop new applications with SAP HANA 1.0 SPS 12 or SAP HANA 2.0.

This affects the following components which will continue to be supported with SAP HANA 1.0 SPS 12 and SAP HANA 2.0 and will be removed from later versions of SAP HANA:

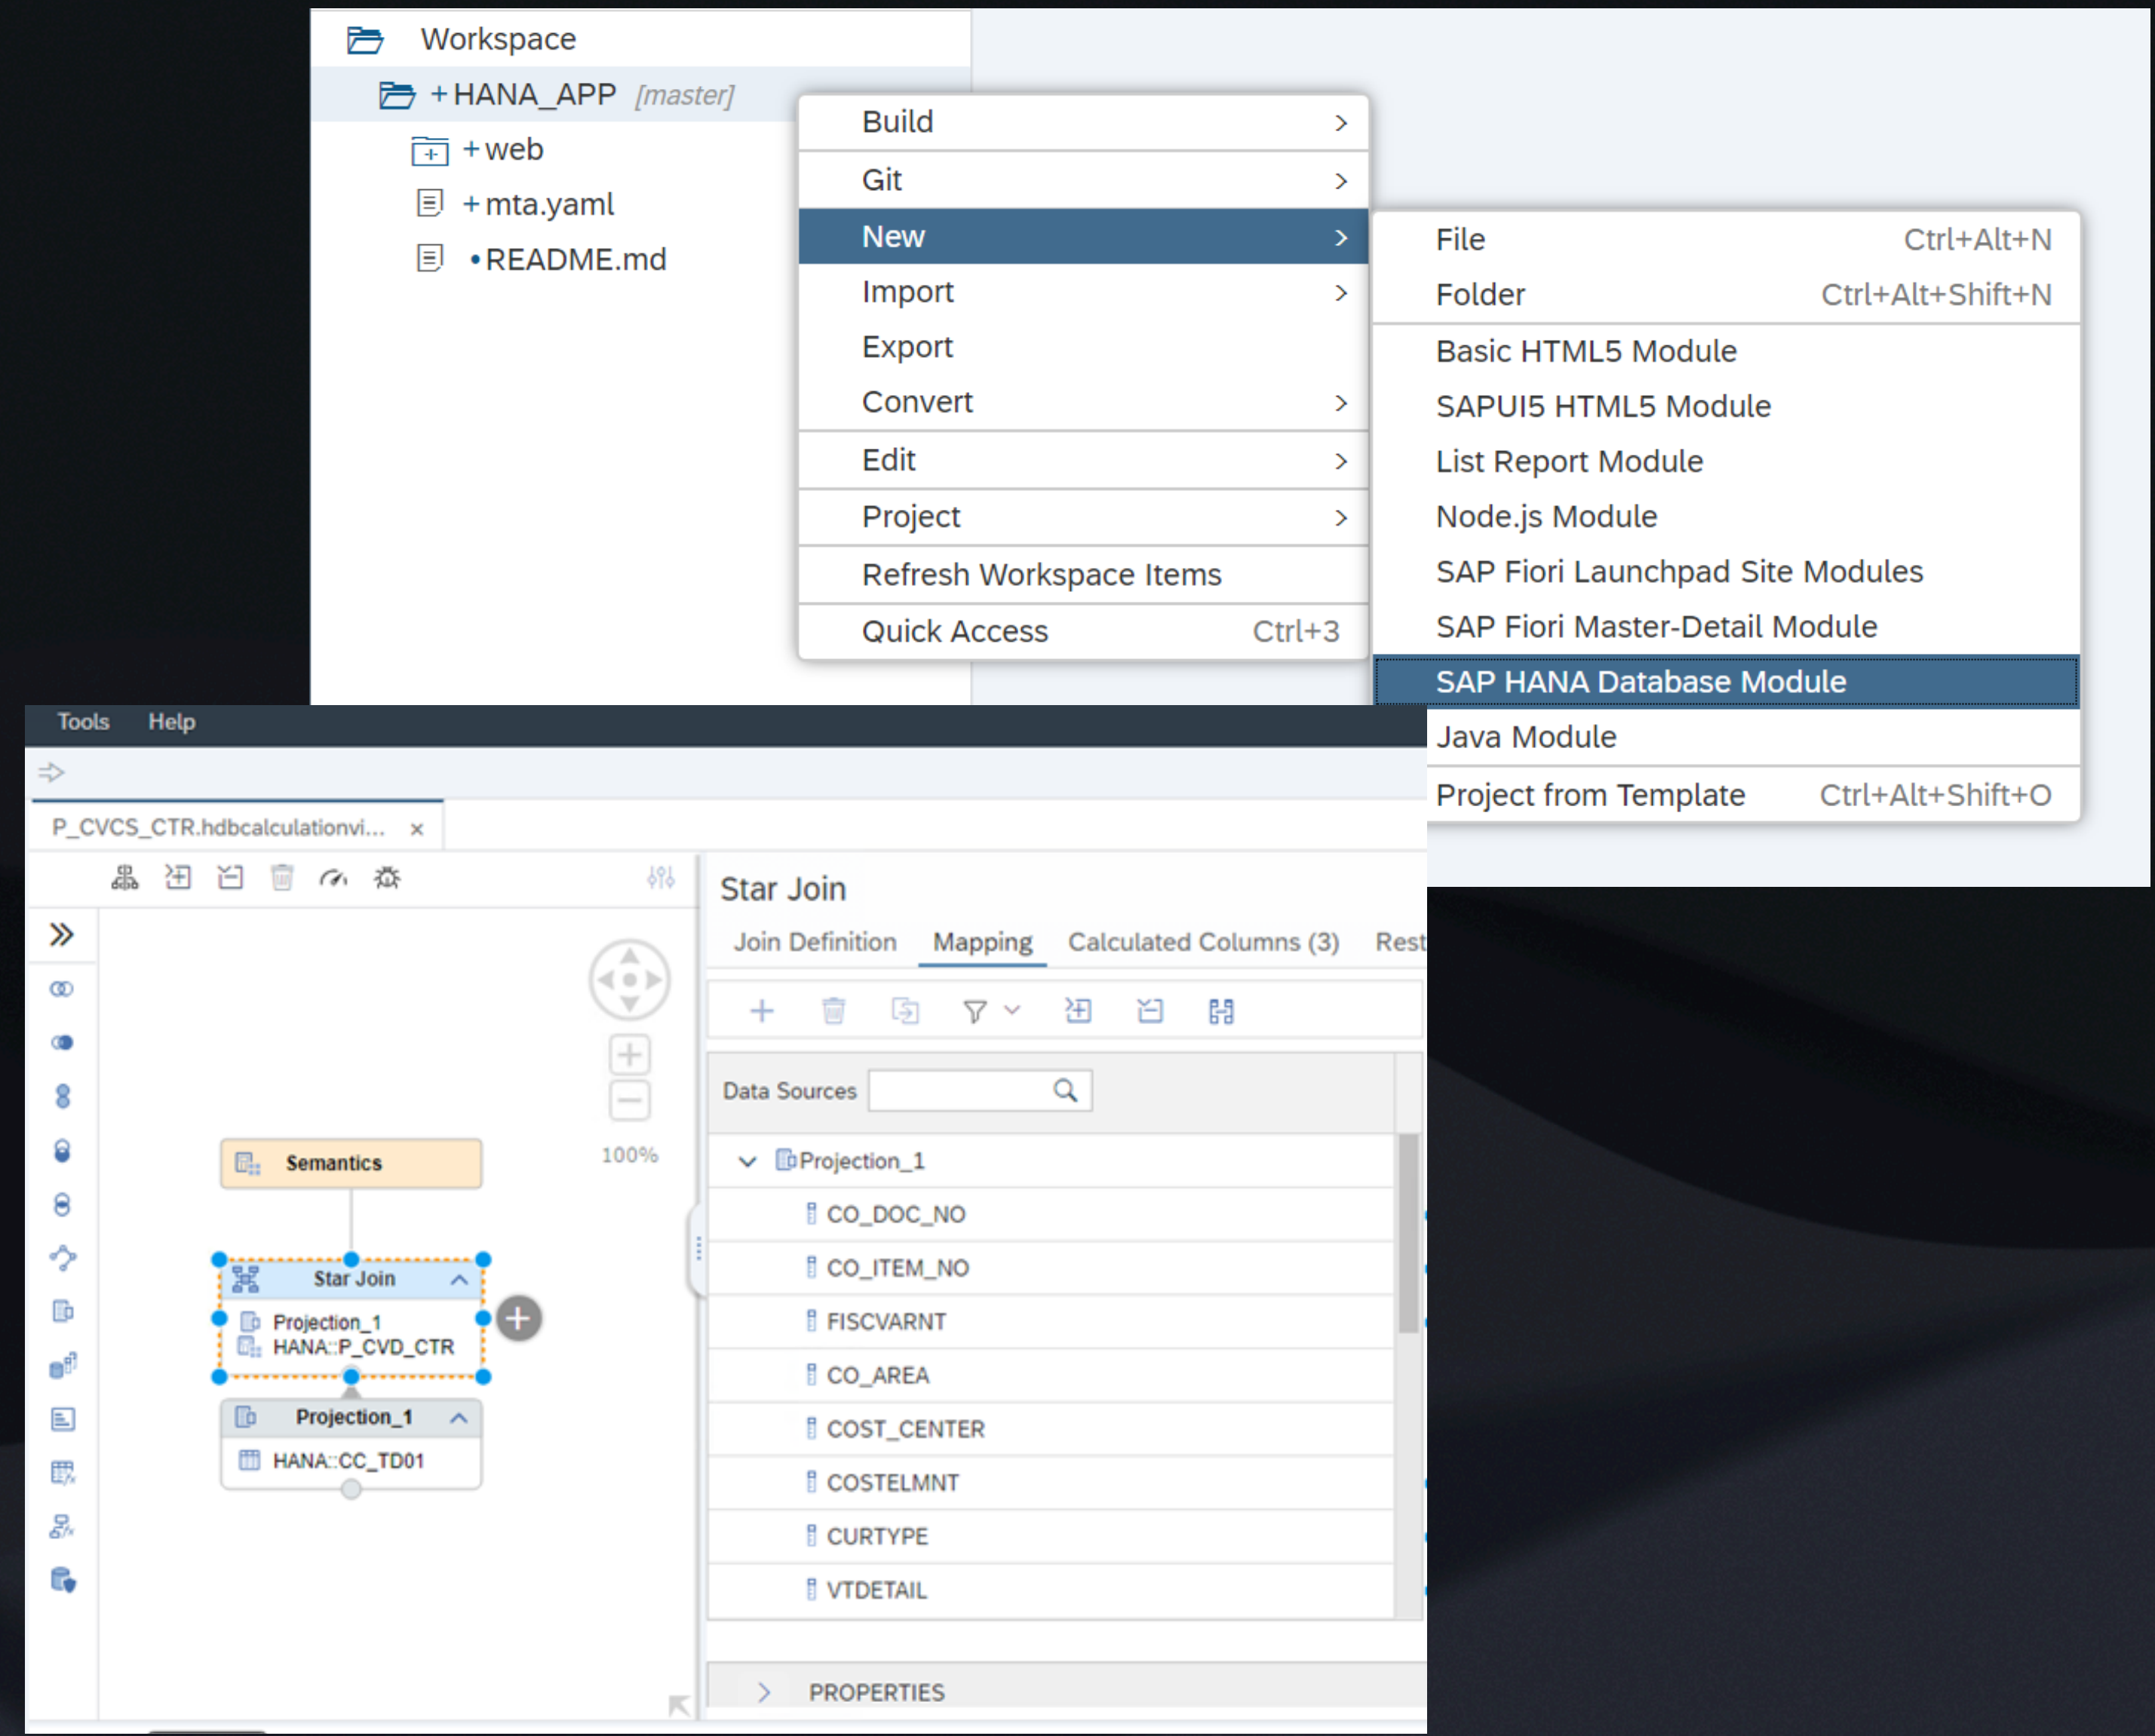

- SAP HANA Studio
- SAP HANA extended application services, classic model
- SAP HANA Repository (XS classic)
- SAP HANA Web-based Development Workbench (XS classic)
- SAP HANA Application Lifecycle Management (HALM) https://help.sap.com/docs/SAP_HANA_PLATFORM/a4d43a319ecf464e9d838454a6bdb9ad/9a012d6438764459a581e6af55a87c46.html
- User _SYS_REPO

For SAP HANA 2.0, XSA is the default framework for application development while XSC and the associated SAP HANA Repository and SAP HANA Studio IDE have been marked as deprecated. Deprecated means that the software is no longer included in the next major release, which is the case for SAP HANA Cloud. Deprecated does not mean it is no longer supported. It is perfectly fine to continue using SAP HANA XS classic apps and the SAP HANA studio with SAP HANA 2.0 SPS 05 until at least end of June 2025.

And now what?

SAP HANA Extended Application Services, **Advanced Model** aka **XSA(2015-?)**

- OnPrem “replica” of Cloud Foundry
- Buildpacks like CF (Node.js, Java,...)
- Can scale out to different nodes
- Each deployed app/db container is self-contained and separated
- Development with “XSA WebIDE” and VS Code + xs cli

Brace yourself, new Releases are coming!

- After 1.1.0 (~June 2023):
“Changes of the minor version number indicate, that either new application runtimes are introduced or applications runtimes that are out of maintenance are removed from the shipment.”
(Note 2955324)

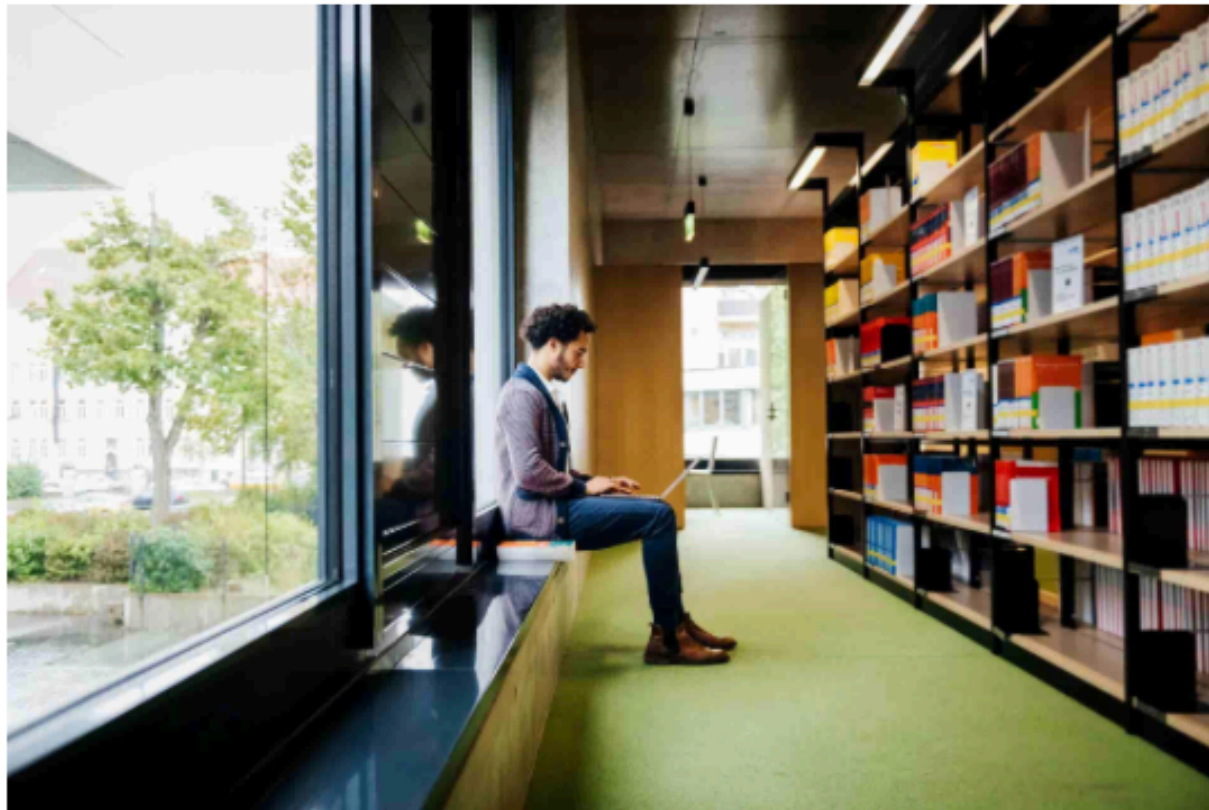

Recent Releases:

- Fixes of really old bugs
- New convenience features!

Node.js Release and Maintenance Roadmap:

Release	Initial Release	End of Maintenance	Default for XS Advanced Version	Shipped with XS Advanced Version
SAP Node.js 0.12	09/2015	11/2017	-	1.0.9 - 1.0.29
SAP Node.js 4	02/2016	01/2018	-	1.0.9 - 1.0.78
SAP Node.js 6	06/2016	01/2019	-	1.0.41 - 1.0.102
SAP Node.js 8	11/2017	01/2020	1.0.82 - 1.0.125	1.0.82 - 1.0.125
SAP Node.js 10	11/2018	04/2021	1.0.126 - 1.0.133	1.0.114 - 1.0.148
SAP Node.js 12	11/2019	04/2022	1.0.134 - 1.0.148	1.0.126 - 1.0.151
SAP Node.js 14	06/2021	04/2023	1.0.149 - 1.0.155	1.0.133 - 1.0.155
Node.js 16	10/2022	09/2023	1.1.0 - 1.1.9	1.0.152 - 1.1.9
Node.js 18	04/2023	04/2025	1.2.0 - 1.2.7	1.1.0 - 1.3.*
Node.js 20	04/2024	04/2026	1.3.0 - latest	1.2.0 - latest
Node.js 22	11/2024	04/2027	-	1.3.0 - latest

Adobe Document Services on XSA?

SAP Forms service by Adobe and SAP Interactive Forms by Adobe.

This contains information about [SAP Forms service by Adobe](#) and [SAP Interactive Forms by Adobe](#).

It also contains information about [SAP's Maintenance Strategy for Adobe Forms On-Premise](#).

As already announced in the Maintenance Strategy, the SAP NetWeaver Application Server Java 7.5 will go out of Mainstream Maintenance at the end of 2027 and out of Extended Maintenance at the end of 2030. After 2030 there will be no further updates. SAP HANA Extended Application Services, Advanced Model (XSA) will be the successor platform for Adobe Document Services.

[SAP plans to deliver this option Q1, 2027](#). Customers can decide to switch from the ADS on NetWeaver AS Java to SAP Forms service by Adobe or the ADS on XSA. This guarantees long-term support of Adobe-based forms functionality for S/4 HANA on-premise solutions.

Typical questions asked about Adobe Document Services on XSA
